

PHẠM TUẤN MINH

Full-stack Developer

19-05-2003 | 0773-772-174 | phamtuanminh19052003@gmail.com | linkedin.com/in/ptm1905

EDUCATION

Ho Chi Minh City University of Technology and Education (HCMUTE)

2021 - 2026

Major: Information Technology / Information Systems

- GPA: 7.46 / 10.00 (2.95 / 4.00)

SKILLS

- Programming Languages: JavaScript (ES6+), TypeScript, Python, C, C++
- Frontend: React (Next.js), Vue.js (Nuxt.js), Web Components, HTML5, CSS3, Tailwind CSS
- State Management: Pinia (concepts transferable to Redux / Zustand)
- Backend & Database: Node.js, Django, MongoDB, SQL Server, Oracle, Prisma ORM
- Testing : Selenium, Playwright (foundational knowledge)
- AI-Assisted Development: Regularly uses AI coding agents (GitHub Copilot, Claude, Cursor) for context preparation, implementation and code review
- Tools: Git/GitHub, Figma, Principle
- Other exposure: Spark, Hadoop, Selenium

WORK EXPERIENCE

Frontend Developer (Full-time Intern)

07.2025 - 12.2025

Website Petpet - Maysoft Company

- Developed the Petpet website for both Desktop and Mobile interfaces using a Mobile-First approach.
- Built a landing page allowing customers to browse products and stay updated with the latest company news.
- Built the application using Nuxt.js as the main framework and Pinia for state management.
- Integrated REST APIs and performed data operations with MongoDB.
- Implemented SSR/CSR rendering strategies and SEO optimization to improve website performance, user experience, and search engine visibility
- Managed source code and workflow using GitHub.

GRADUATION THESIS

AI Virtual Fitting Room - TMF Fashion

02.2026 - 07.2026

Solo Developer - Fashion e-commerce platform with AI-powered 3D virtual try-on

- Independently designed and developed a full-stack fashion e-commerce website, covering product browsing, news updates, online ordering and payment.
- Built the frontend with Next.js (React) and the backend with Node.js, using MongoDB as the database.
- Researched and integrated advanced AI models (TailorNet and SMPL) to reconstruct 3D human body models and simulate garment fitting for a 3D virtual fitting room feature.
- Managed source code and development workflow using GitHub.
